

Lindsey Abramson

New York, New York, 10025 | 203.800.6170 | labramson55@gmail.com | [Linkedin](#)

EDUCATION

Columbia University Mailman School of Public Health

New York, New York

Master of Public Health, Epidemiology; Certificate in Infectious Diseases - GPA 3.92

Anticipated Graduation: May 2026

- *Relevant Coursework:* Epidemiology II, Analysis of Categorical Variables, Applications of Epidemiological Research Methods, Data Science I, Epidemiology III, Emerging Infectious Diseases.

Kenyon College

Gambier, Ohio

Bachelor of Arts, Biology, Minor: Chemistry | Magna Cum Laude - Cumulative GPA: 3.71

May 2024

- *Relevant Coursework:* Organic Chemistry, Physics, Statistics, Calculus II, Disease Ecology, Biochemistry, and Microbiology.
- *Honors/Awards:* Biology capstone distinction, Merit List (Fall 2020-Spring 2024), Sigma Xi Member (scientific research honor society), NCAC Academic Honor Roll (2020-2023), Distinguished Academic Scholarship.
- Kenyon college varsity volleyball (Fall 2020- Spring 2024). 4 year letterwinner & starter, 2 year captain (Jr. and Sr.). Academic All-NCAC and All-NCAC third team (2023).

INDUSTRY EXPERIENCE

Johnson & Johnson

Raritan, New Jersey

Global Medical Affairs Intern, Neuroscience

June 2025 - August 2025

- Conducted a scientific competitive intelligence analysis by summarizing primary clinical literature on 12 of Caplyta's competitors in major depressive disorder and bipolar depression to support internal publication strategy development.
- Planned and developed 3 Alzheimer's disease patient/care partner advisory board meetings, by creating discussion guides, and implementation plans focused on the patient journey, mental burden, disease-modifying treatments and genetic testing.
- Performed a landscape analysis of 8 Alzheimer's patient organization conferences, mapping event dates, abstract submission guidelines, and sponsorship opportunities to identify strategic scientific and patient engagement opportunities.

RESEARCH EXPERIENCE

Columbia's Ecology Epidemiology Lab

New York, New York

Researcher Assistant, PI Dr. Maria Diuk-Wasser

May 2024 - Present

- Researched the eco-epidemiology of vector-borne diseases (lyme disease) throughout 38 parks across NYC and Long Island through field work and surveys. Tick dragging and identification experience. Currently training an online AI tick ID system.
- Created a spatial abundance distribution map of ticks including Ixodes scapularis, Amblyomma americanum, Dermacentor variabilis, and Haemaphysalis and found infection rates of Lyme disease to aid in the distribution of VLA15. Also worked with the meso mammal team to vaccinate raccoons against rabies and collect morphometric data and samples.

Kenyon Summer Science Scholar and Student Researcher

Gambier, Ohio

Animal Researcher, PI Dr. Iris Levin

Summer, 2022 + 2023-2024 School Year

- Analyzed how phenotype/colony size affects sexual selection in barn swallow birds throughout Knox County, OH. Extensively researched the Hamilton and Zuk hypothesis and crafted a literature review on this topic.
- Accurately sampled 500+ wild birds, including catching, banding, taking blood samples, and morphometric measurements of nestlings and adults. Quantified coloration by using an oceanOptics Flame UV/Vis spectrometer.
- Conducted independent research on avian blood parasites and avian malaria (DNA extraction, sequencing and analysis, PCR, gel electrophoresis, quantitative statistical analysis using R studio). Presented research on Kenyon Summer Scholars day.

CLINICAL EXPERIENCE

Sandbank Veterinary Hospital

Cheshire, Connecticut

Veterinary Assistant

Summer, 2023

- Assisted doctors in ~10 examinations a day including vaccination appointments, X-rays, and surgical procedures. Prepared vaccinations, updated charts, ran in house blood panels, sent Antech labs out, prepared prescription medications.
- Led the change in software implementation to Daily Smart Vet, helping the staff transition to a paper free office.

SKILLS AND INTERESTS

Data Analysis Skills: R STUDIO, SAS, Microsoft Excel & PowerPoint.

Laboratory Skills: DNA extraction, purification, sequencing and analysis skills, PCR with gel electrophoresis, & Spectrometry.

Interests: Academic interests include disease ecology, Immunology, Biostatistics, Onehealth, and anything related to animals. Outside of academia, I love hiking and being outdoors, running or anything athletic, and I am the proud mom of many plants!
